Vercel

FOCUS

Practical products
Business tools
Full-stack systems
Real-world problems

BUILD. LEARN. SHIP.

PROFILE

Computer Science student from Ethiopia who learns by building complete software products. I create full-stack applications, business tools, and platforms focused on practical needs, clear user experiences, and dependable systems.

SELECTED PROJECTS

Telegram Shop Assistant

Node.js / Express / Supabase / Telegram Bot API

Business assistant for product and FAQ management, customer conversation storage, lead and order collection, automation, and human takeover.

Event Venue Marketplace

Next.js / React / Supabase / Vercel / Turnstile

Venue discovery and listing platform for Ethiopia with image storage, authentication, protected pages, and an administrative listing workflow.

Sales & Lottery Platform

Application design / Full-stack development

Customer-facing application combining product sales with a lottery-based promotional experience in a clear, mobile-friendly flow.

PROJECT-BASED EXPERIENCE

- Backend API development and third-party integrations
- Database design, storage, authentication, and access control
- Frontend implementation across responsive interfaces
- Deployment, debugging, and end-to-end workflow testing

EDUCATION

Computer Science Studies - In Progress

Ethiopia

WORKING APPROACH

IDEA -> CODE -> PRODUCT -> LEARN

Available for software engineering opportunities and internships.
