Node.js / Express
REST API development
Telegram Bot API

DATA & TOOLS

Supabase / SQL
Git / GitHub
Vercel

FOCUS

Practical products
Business tools
Full-stack systems
Real-world problems

PROFILE

Computer Science student from Ethiopia who learns by building complete software products. I create full-stack applications, business tools, SaaS ideas, and platforms focused on practical needs, clear user experiences, and dependable systems.

SELECTED PROJECTS

Telegram Shop Assistant

Node.js / Express / Supabase / Telegram Bot API

Telegram-based business assistant for small businesses. Supports product and FAQ management, customer conversation storage, lead and order collection, human takeover, authentication, and multiple operators.

Event Venue Marketplace

Next.js / React / Supabase / Vercel / Turnstile

Venue discovery and listing platform for Ethiopia. Includes venue images, authentication, protected pages, an admin dashboard, Supabase database and storage, and production deployment on Vercel.

PROJECT-BASED EXPERIENCE

- Backend API development and third-party integrations
- Database design, storage, authentication, and access control
- Frontend implementation across responsive interfaces
- Deployment, debugging, and end-to-end workflow testing
- Turning real business and community needs into working products

EDUCATION

Computer Science Studies - In Progress
